
HOW TO BE A SPELLING WIZARD

Even though you try your best, there are probably certain words that trip you up when you try to write them down, and cause mistakes over and over again.

It doesn't have to be like this, though. Use the memory tricks shown here and your spelling will improve quicker than you can say – or spell – Abracadabra!

Acceptable

'Acceptable' can cause problems because you can't tell by the sound if it should end in **–able** or **–ible**. Remember the correct spelling by using the sentence:

I am **able** to **accept** that.

Arithmetic

Here's one of those 'acrostics' to help you remember how to spell this tricky word. Remember, the sillier the sentence, the more easily it will stick in your mind:

A Robber **I**n **T**he **H**ouse **M**ight **E**at **T**he **I**ce **C**ream.

Believe

I do not be**lie**ve your **lie**s.
